ABOUT ME

I'm a Front-End Developer with hands-on experience in responsive UI development using HTML, CSS, JavaScript, and React. I enjoy building clean interfaces, improving user experience, and turning ideas into working products. I'm continuously learning modern tools and polishing my real-world project skills.

EDUCATION

2021 - 2024

RGPV University

Diploma in Computer Science & Engineering

Gained strong foundations in programming, software development, and applied computer science

2024 - 2027

(Expected)

RGPV University

Bachelor of Technology in Computer Science & Engineering (CSE)

Focusing on core CS concepts, front-end development skills, and practical project-based learning.

PROJECTS

2025 - JUN

HealthConnect

Built the React front-end for HealthConnect with signup/login, email verification, and a clean mobile UI. Integrated APIs, doctor listings, and appointment booking with date-time selection for a smooth user experience.

Tech.

Github :-

Live :-

• HTML/CSS • React.js • Tailwind • Firebase

2025 - DEC

Real-Time Chat App

Built a real-time chat app where users can create accounts, send/receive messages instantly, and stay online with live status. Designed a clean UI, message options, and smooth one-to-one chatting for a fast user experience.

Tech.

Github :-

• HTML/CSS • React.js • Tailwind • Supabase
